probabilities of survive of an coelacanth
then recompressed, like an dive stage for an accident of
decompression. Today again, our friend dives of the Comores
himself yours upon the foot of war with an cage to immerse at 80
meters, just in face of the mansion of coelacanth. Of the how
people to their to signal an new fossil to wriggle at end of an
offpsring, they the capitol within the cage for the redescend at
200 meters of the sort, people to not verifier itself they to
recover good its eggs enclosed within the abdomen of the femal
this ancient four foot order not to cease ever of our to rest of
the questions. By example, an ??? todays how they is ovovivipare,
it is at speech when the eggs enclosed with the abdomen same of
the female, whom ??? bottom after of the small each forms, at to
manner of the mother shark, of the viper and...of the mammiferes!
Meanwhile, void not ??? again at who resembling his affection
Finally, the more fascinating mystery dwelling on the eventually
existence of other coelacanths in of other region submarine. Why
not in to discover when on the slopes of the Comores? Of 1976,
the anatomist Francasi Anthony report within one register
thrilling, "THE HUNT TO COELACANTH". Unfortunately exhausted, the
extraordinary discovery of Maurice Steinert. Today biologist
molecular of Bruselles, the latter myself at recently the
magnificant coelacanth of silver length of 35 centimeters how
they had to buy in 1965 with an Spanish antique-dealer. Each to
indicate when this fish at being manufactured at north of the
Spain before the beginning of this century, then good before the
discovery of Miss Latimer. Of or the artist ??? they data the
model how they to if accurately reproduce?
Twenty years after my first dive in diving suit, grace at
submarine "GEO" I have ??? finally to assist at nocturnal
activity of coelacanth. For the to see to develope counterpart
the day they fault to dive at top of 200 meters, limit actually
of our machine. Another sphere is in construction, whom to permit
of descend to 600 meters. Which ??? at which short story wonders
this we point to have? -END-
